

We provide web development and full design services for your project, get custom designs and development coding to your specific needs. We also provide extensive support and backup services for your website. Our hosting packages can meet any budget.

We provide a **Basic Hosting Package** that allows you to get started on the web; we also provide a more advanced **Enterprise Package** for larger web projects. Both packages provide email management with unlimited (space, SQL databases, and unlimited bandwidth) for your web project. We also provide 24/7 support to our customers. Our website hosting packages are filled with features that allow your business to succeed online.

Our hosting packages are robust with unlimited of disk space and SQL databases; this allows you to expand rapidly. We provide the tools for you to grow your web project so you can have an impact on the Internet as you increase your user or customer base.

Email us at support@netmediadesigns.com for more information on our Web Hosting Packages.

Get your message out with video, use your videos for social marketing, seminars and at other events. Use our video streaming technologies to enhance your online marketing.

Use social submissions and interact with your users, use e-commerce to accept online credit card payments, take advantage of streaming video and other new media features.

We can develop a complete enterprise web portal with advance features, mobile access and web applications. We also provide website upgrades; update your existing website with more advanced web technologies. If you need more than a website, **netmediadesigns.com** can develop and host a complete enterprise web solution for your business or organisation.

Regardless of your organisation's requirements, we have a digital publishing solution for you. Our production services deliver professional videos, web content and digital documents; we produce content which is designed specifically for your target audience.
